TERRELL FRANCIS

Technology & Operations Leader | Implementation & Onboarding | Healthcare SaaS & Staffing | IT Systems

Aubrey, TX | 832.475.1824 | iterrellfrancis@gmail.com | linkedin.com/in/terrellfrancis | terrellfrancis.app

SUMMARY

Technology and operations leader with 6+ years taking software from contract to live across healthcare SaaS, fintech, staffing, and multi-site IT. Director of Technology Development & Operations at Talencia by KAD, leading the move to one combined staffing platform and a consolidated tool stack. At Wellfit Technologies, carried **85+ concurrent SaaS implementations** as primary client contact and rebuilt the process into a playbook that **cut cycle time ~85%**. Previously supported 700+ MB2 Dental locations, including an ~800-device go-live. Founder of TK Hub LLC; Certified ScrumMaster.

CORE SKILLS

Technology & Operations: technology roadmap, systems consolidation, tool and vendor evaluation, Microsoft 365 administration, data migration planning, training program design

Implementation & Onboarding: SaaS implementation, customer onboarding, discovery and requirements, configuration to business process, go-live readiness, post-implementation support, support handoff

Customer Success & Delivery: primary client point of contact, stakeholder alignment, end-user training, project management across concurrent accounts, Agile / Scrum (CSM), playbooks and process improvement, team leadership

Systems & Tools: multi-site systems administration, hardware/software deployment, Microsoft 365 (Excel, Word, PowerPoint, Teams, SharePoint, Forms), Dynamics 365, CRM platforms, project trackers, ticketing systems (Zendesk familiarity), App Store / Google Play releases

EXPERIENCE

Talencia by KAD | **Director of Technology Development & Operations** — Dallas–Fort Worth, TX | Nov 2026 – Present

Healthcare staffing

- Own the technology roadmap: one combined staffing platform across web, desktop, and mobile, with community and subscriptions built in, replacing a legacy staffing system. Website first, then platform and data migration.
- Lead a consolidation review of communications, recruiting, payroll, and client tools, mapping each tool's purpose, cost, and overlap to decide what is kept, integrated, or retired.
- In week one, took over Microsoft 365 administration and built the recruiting-platform training program: course shell, captioned video lessons, and **10 knowledge-check quizzes** ready for staff rollout.

TK Hub LLC | **Founder & Chief Executive Officer** — Aubrey, TX (Remote) | May 2026 – Present

tkhub.app

- Founded TK Hub and ship a portfolio of 10 apps (APEX, Role, Booked, Curb, Zilt, Our People, RADR, TORQ, Afterglow, and Noir), owning product from concept to release with AI-assisted development.
- Own App Store and Google Play releases, domains, and first-run setup; stand up each new app, connect the systems behind it, and take it from install to a live account.

Wellfit Technologies | **Implementation Manager** — Irving, TX (Hybrid) | Apr 2024 – May 2026

Healthcare fintech SaaS

- Took new accounts from signed contract to live as the primary client point of contact, carrying **85+ concurrent SaaS implementations** through discovery, configuration, training, and go-live.
- Rebuilt a fragmented implementation process into a repeatable playbook that **cut implementation cycle time ~85%**.
- Led a two-person implementation team while personally owning the most complex client projects.
- Configured software and connected devices around each client's real business process instead of a generic template.
- Owned setup, end-user training, and help-center handoff, so clients ran independently and Support inherited clean accounts.
- Kept client leadership and internal Product, Engineering, Support, and Sales aligned on goals, risks, dates, and decisions from kickoff through launch.

MB2 Dental | **IT Field Technician / Systems Administrator** — Carrollton, TX (Hybrid) | Aug 2020 – Apr 2024

Dental support organization

- Implemented and supported software, hardware, and connected systems across 700+ dental locations, on-site and remote, in live environments where downtime hit operations immediately.
- Delivered an **~800-device hardware and software go-live** using serial tracking and remote installation.
- Trained clinical and admin staff and coordinated vendors, site leaders, and internal teams through deployments and incidents.
- Documented configurations and procedures that made later implementations faster and cleaner.

Asurion | **Customer Service Delivery Tech Expert (Part-Time)** — Coppell, TX | 2020

- Delivered in-person technical support and smart home setup for customers in a high-demand service environment.

EDUCATION & CERTIFICATIONS

- B.S. Management Information Systems | The University of Texas at Arlington | 2016 – 2020
- Certified ScrumMaster (CSM) | Scrum Alliance | Credential ID 001750935 | Issued Apr 2025
- PGP in AI & Machine Learning: Business Applications (Certificate) | McCombs, UT Austin | 2026 – 2027
- M.S. Computer Science, AI & Machine Learning | Western Governors University (WGU) | Enrolling 2026
